Day 5 - Testing and Backend Refinement - [Your Marketplace Name]

Product Listing:

```
const [Data, setData] = useState([])

Computers\OneDrive\Documents\one drive\OneDrive\Desktop\Hackathon-
\components • Contains emphasized items
const fetchProducts = async () => {

  const data = await client.fetch(`*[_type == "product"] {
            category,
            name,
            slug,
            "image" : image.asset->url,
            price,
            quantity,
            tags,
            description,
            features,
            dimensions,
            }`)

  setData(data)
}

fetchProducts()
```

Fetching Data from sanity throught the Grooq query ..

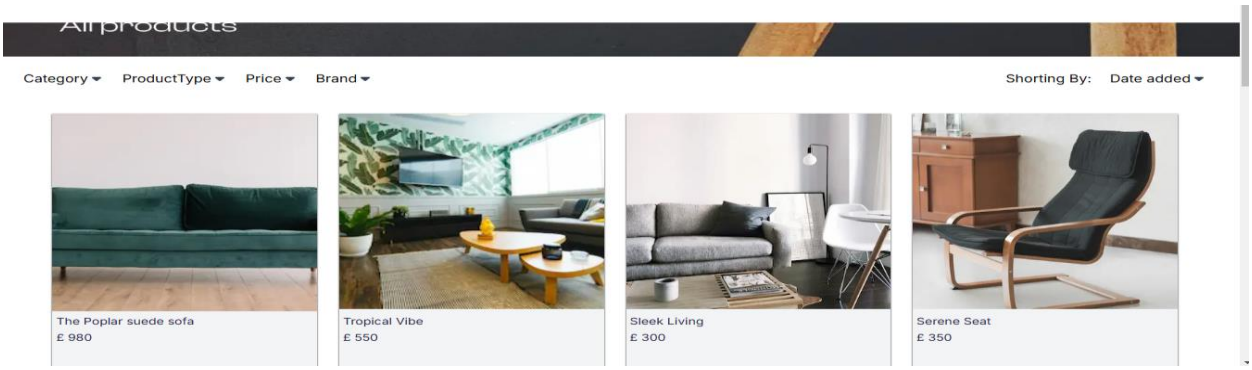
```
{/* first line products */}

<div className=" w-[90%] mx-auto grid grid-cols-2  md:grid-cols-4 gap-6 my-8 font-Clash " >

  {currentpages.map((product: any) => {
    return (
      <Link key={product.slug} href={`${product.slug.current}`}>
        <div className='flex flex-col h-[300px] sm:h-[320px] md:h-96 w-full   bg-gray-100 shadow-sm  shadow-black
          <div className='w-full mx-auto ' >
            <Image className=' w-full object-cover  h-[212px] sm:h-[245px] md:h-72 group-hover:scale-105 transition-
          </div>
          <div className='text-sm gap-1  text-[#2A254B] flex flex-col my-2 px-1 ' >
            {product.name}
            <p  > {`\u00A3 ${product.price} `}  </p>
          </div>

        </div>
      </Link>
    )
```

Successfuuly fetched data ..and Rendering data throught the map function .. and also added pagination



..

```
<>
  <div className=" max-w-[1440px] mx-auto fixed top-0 w-full bg-white z-50 " >
    {/* Banner */}
    <header className="flex  h-[85px] md:h-[51px]   text-[#22202E] items-center py-4  md:py-0 justify-between px-6 mt

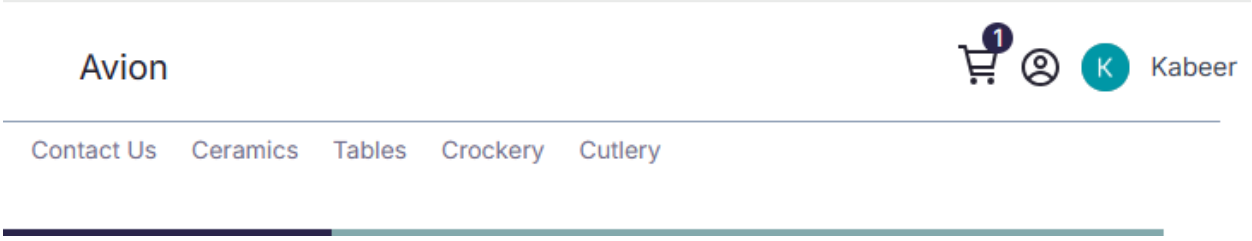
      <div className="flex  gap-1 items-center  text-end md:w-1/3 order-2 md:order-1 absolute z-50  right-32  md:static
        {!searcbaropen && (
          <div className="absolute flex gap-2 top-[50px] md:static md:block w-[248px]  bg-white border-[#22202E] p-
            <form onSubmit={handlesubmit} >
              <input
                className="w-[150px] text-[14px] rounded-md  px-1 border-gray-400 border-[1px]"
                type="text"
                placeholder="Search..."
                value={searchingData}
                onChange={(e) => setSearchingData(e.target.value)} />
              <button type="submit" className="text-[15px] my-auto mx-auto font-semibold text-gray-800 ">Search</butt
            </form>
          </div>
        )}
        <CiSearch onClick={tooglesearch} className="order-2 text-2xl cursor-pointer  md:order-1 absolute  z-50 block ri
      </div>
```

Added search functionality through the filter function and used use state ,, e.target value …

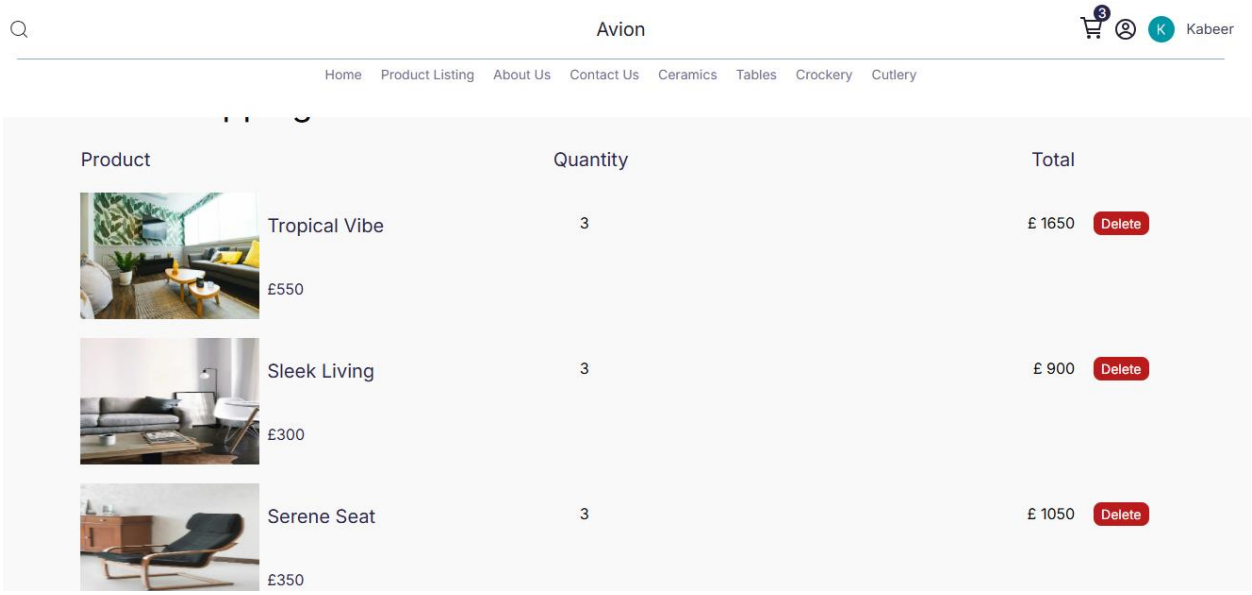
```
<>
  <div className=" max-w-[1440px] mx-auto fixed top-0 w-full bg-white z-50 " >
    {/* Banner */}
    <header className="flex  h-[85px] md:h-[51px]   text-[#22202E] items-center py-4  md:py-0 justify-between px-6 mt

      <div className="flex  gap-1 items-center  text-end md:w-1/3 order-2 md:order-1 absolute z-50  right-32  md:static
        {!searcbaropen && (
          <div className="absolute flex gap-2 top-[50px] md:static md:block w-[248px]  bg-white border-[#22202E] p-
            <form onSubmit={handlesubmit} >
              <input
                className="w-[150px] text-[14px] rounded-md  px-1 border-gray-400 border-[1px]"
                type="text"
                placeholder="Search..."
                value={searchingData}
                onChange={(e) => setSearchingData(e.target.value)} />
              <button type="submit" className="text-[15px] my-auto mx-auto font-semibold text-gray-800 ">Search</butt
            </form>
          </div>
        )}
        <CiSearch onClick={tooglesearch} className="order-2 text-2xl cursor-pointer  md:order-1 absolute  z-50 block ri
      </div>
```

Added Cart functioonlity in slug page .. then managed slug through the redux tool kit in cart page …

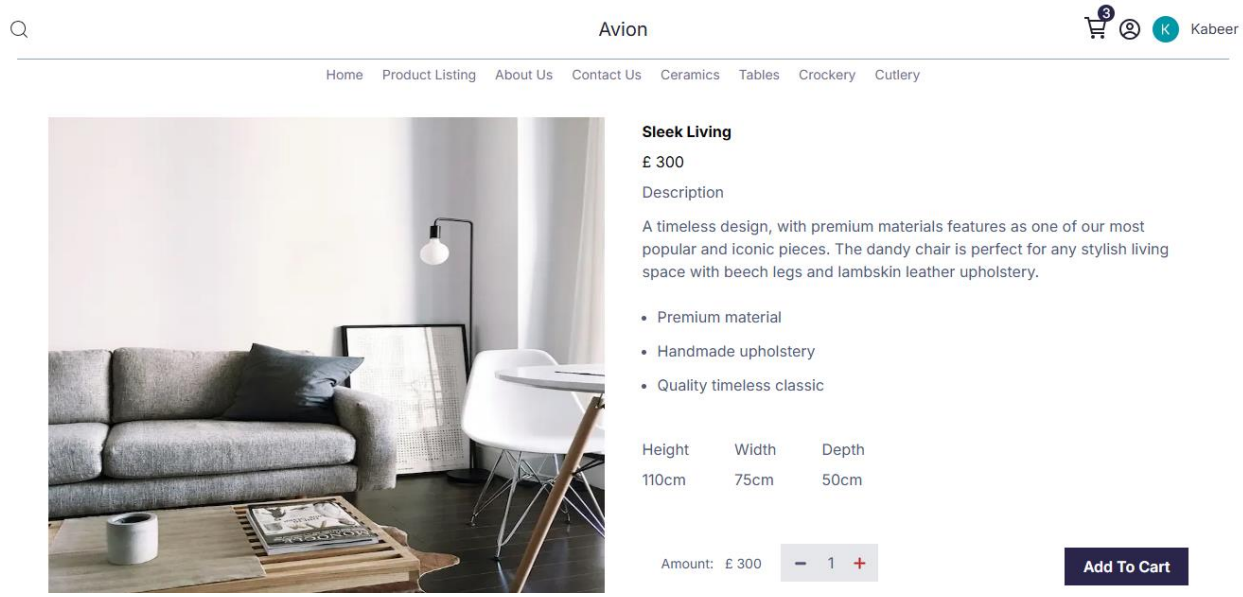


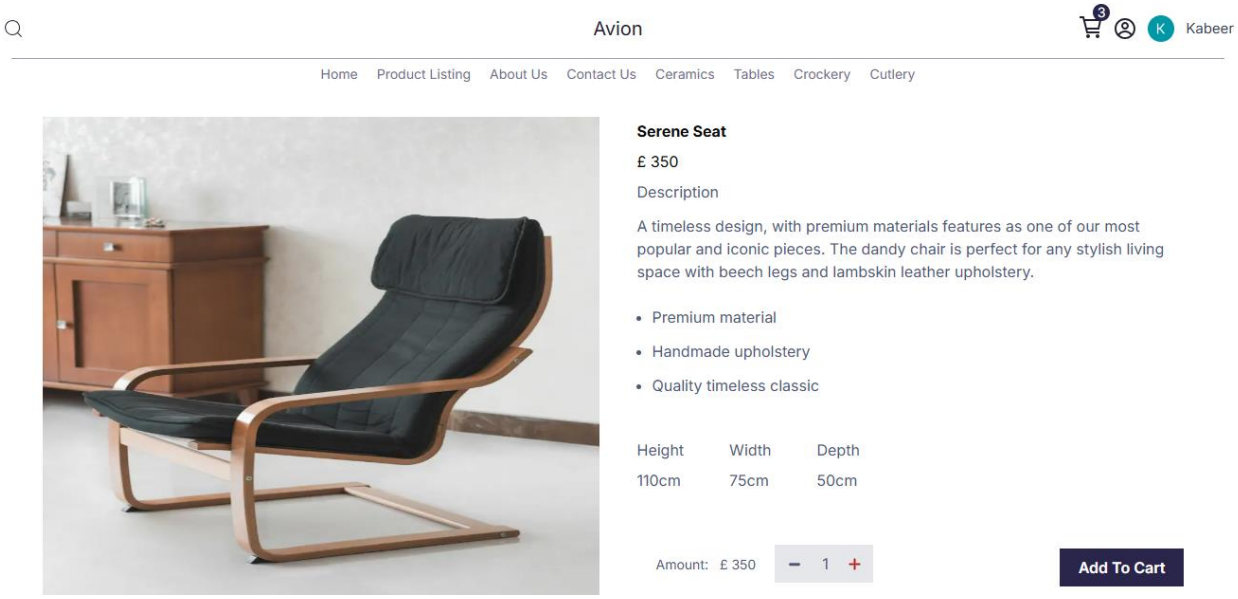
Successfully added product in cart page and also I use notification alert with toastify library ..



Added successfully products in Cart page .. also I add delete button .. so this delete button is managed thorugh the redux toolkit library …

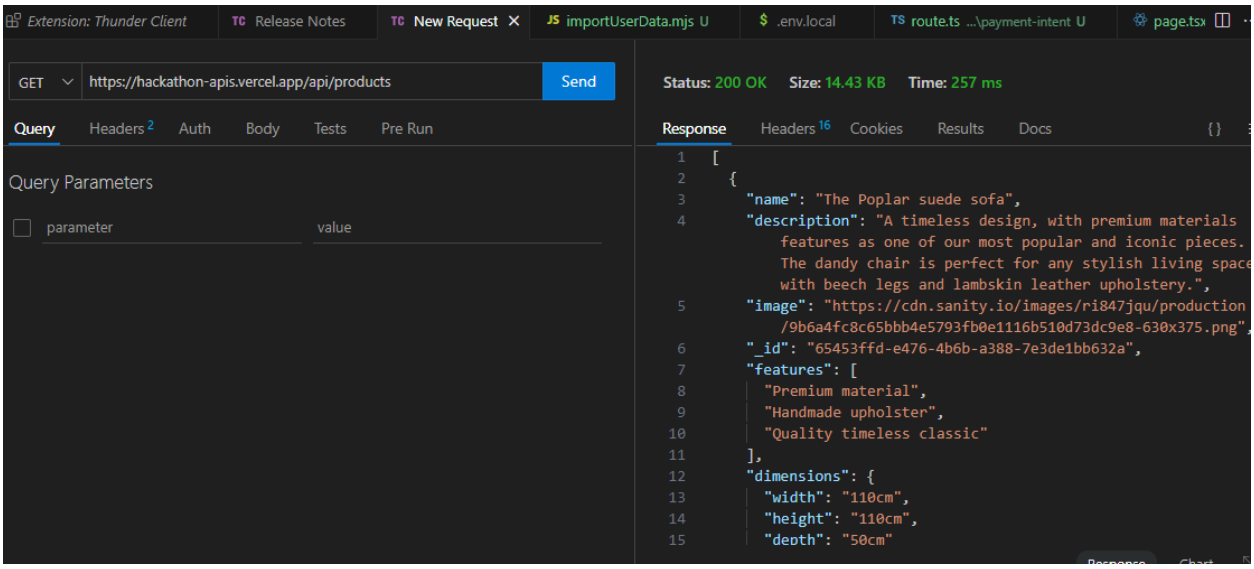
Dynamic Routing :





I added dynamic routing through the slug .. .. every produt will display with own details and image .. ..

Thunder Client : I used for API response testing .



I checked the stats of api through the thunder client which is better and also given response is good ..

Testing Reposrt Sample .Csv

Test Case ID	Test Case Description	Test Steps	Expected Result	Actual Result	Status	Severity Level	Assigned To	Remarks	
2	TC001	Validate product listing page	Open product page > Verify products	Products displayed correctly	Products displayed correctly	Passed	Low	-	succefull
3	TC002	Test API error handling	Disconnect API > Refresh page	Show fallback UI with error message	Error message shown	Passed	Medium	-	Error handled
4	TC003	Check cart functionality	Add product to cart > Verify cart contents	Cart updates with added product	Cart updates as expected	Passed	High	-	No issue found
5	TC004	Ensure responsivenes s on mobile	Resize browser window > Check layout	Layout adjusts properly to screen size	Responsive layout working as intended	Passed	Medium	-	Mangged correctlly

DIAGNOSTICS

79

Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

92

SEO

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on Core Web Vitals. Learn more about Google Search Essentials.

RAWLING AND INDEXING

robots.txt is not valid — 1 error found

appear in search results, crawlers need access to your app.

75

Best Practices

ERAL

Uses third-party cookies — 2 cookies found

Browser errors were logged to the console

Issues were logged in the `Issues` panel in Chrome Devtools

Missing source maps for large first-party JavaScript
